Fall Weather Safety

Fall weather is here. Here's what you Autumn know!

As the days get shorter and temperatures fall, a new round of weather hazards are on the rise. This transitional season often features weather hazards seen during both warm and cold months, including hurricanes, wildfires, intense winds, flooding, droughts, and more.

Below are some tips to help you and your family stay safe this fall!

1. Know Your Risk: Check the Weather Forecast Daily

- ◆ Start your day with weather.gov, whether it's on a computer, phone or social media.
- ◆ Check the weather forecast before you leave home, so you'll know what to expect during the day.

2. Take Action: Prepare for Weather Hazards

Be prepared for it. Get ready with an emergency supplies kit and a family communications plan. An emergency supplies kit is a box containing vital supplies that you may need during an emergency, such as food, water and medicine, while a family communications plan lists alternative ways of getting in touch with family and friends during an emergency.

Be A Force of Nature:

1. Share Your Weather Preparedness Story.
2. Take a photo of your emergency supplies kit and share it with family and friends.
3. Talk to neighbors about what to do if a storm strikes.
